### [FRONT COVER]

Want To Defend [COMPANY NAME] From Cyber Attacks?

### [BACK]

#### **Guard Your Reputation with Cyber Security**

A cyber attack could stop your business in its tracks.

And damage your brand.

But you can make your business safer. To keep the hackers out.

#### **Our FREE security penetration test is an early warning.**

You'll discover the gaps in your cyber security. So you can fix them before others find them.

We can also help improve your security with:

- Firewalls to prevent hacks, viruses and malware
- Access controls to safeguard your network
- Data backups to keep your business running

With trusted brands such as Cisco, Mimecast and Sophos we can keep your business safe. And protect your customers' data.

Give yourself peace of mind.

**Book your FREE security penetration test today.**

### [FRONT COVER]

Does [COMPANY NAME] Pay Too Much For Calls?

### [BACK]

#### **Avoid Being Stuck with High Call Costs**

Fixed phone lines mean steep charges.

And you worry about the hassle of changing.

But you can make savings with the latest telephone technology - IP telephony. Because you get:

- Free calls between sites
- Cheaper call rates
- And you'll need fewer fixed phone lines

What's more, if you switch now you're ready for the future shut down of ISDN.

#### **It's easy to change.**

Because we bring 20 years' experience to help you. So there's little or no downtime for your business.

**Contact us today to switch and save on your call costs.**
